**Phase 2 of the ramp-up of lab research: Starting Monday July 6**

1. **We will progressively increase the number of people allowed per bay at one time.** Initially, this increase will be limited to two individuals, pairing senior personnel with a junior trainee, until further notice. Both individuals in a bay should maintain a two-meter distance and always wear face masks. Work schedules should be coordinated such that the same two individuals always share the same bay. Individuals are not obliged to work in the same bay and if either party chooses not to, they should inform their PI of their lack of consent.

2. **Conference rooms can be accessed** by up to six people at a time with the requirement that a 2m distance is maintained between individuals at all times. Attendees must wear a mask at all times as well. Please contact Gabriella Di Pancrazio (gabriella.dipancrazio@ladydavis.ca) to reserve a conference room.

3. **Access to the animal facility is now permitted** before 10 AM and after 2PM Monday-Friday.

4. **Training to use core facilities resumes** (microscopy, flow cytometry, Animal Quarters). To be trained in the use of these facilities, please coordinate with Christian Young (cyoung@igh.mcgill.ca) for microscopy and flow cytometry, and Yvhans Chery (yvhans.chery@ladydavis.ca) for Animal Quarters. Each of them will establish their own protocols on when and how the training sessions will be conducted.

Please direct any questions you have to either Josie (Cancer labs) or Koren (MRM labs).
