

Clinical Research Assistant

Lady Davis Institute - Participant research is conducted at Rene Cassin CLSC

18-21\$ per hour depending on experience

Full-time Position (9-17:00) (35 hours/week)

We are currently looking for an empathetic, hardworking and organized individual to fill our position of clinical research assistant. The clinical research assistant's role is to work with our participants who are diagnosed with various neurological diseases (Alzheimer's, MCI, FTD). The clinical research assistant will be administering tDCS (transcranial direct current stimulation) as well as various neuro-psych tests and tasks with the participants.

The responsibilities of this role include but are not limited to

- Working with participants and adhering to the various study protocols
- Administering various neuropsychological tests as indicated in the protocol
- Data cleaning, collecting and recording
- Assisting in drafting and editing manuscripts
- Assisting with grant writing, submission
- Following up and managing participant questionnaires

Qualifications and Experience

- Bachelor's degree (preferred)
- Proficient with Microsoft Office
- Excellent writing skills in both English and French
- Ability to work in a team and independently
- Experience conducting statistical analyses is an asset but not required
- Prior experience with Alzheimer's or Dementia is an asset but is not required

Benefits:

- Health Insurance Plan
- Paid sick days
- Vacation days

Education:

- Bachelor's Degree (preferred)

To apply, please email a cover letter and CV to tdcs.labs@gmail.com.

Please note that only applicants selected for an interview will be contacted.
