MAVAN-R: Research Assistant

Position Type
Immediate Full-Time

Job Title
Research Assistant

Job Function
Research Assistant

Job Description
The Mental health in Adulthood: VAriability in Neurodevelopment and Resilience (MAVAN-R) project, the adult version of the Maternal Adversity, Vulnerability and Neurodevelopment (MAVAN) longitudinal study, and part of the Developmental Research in Early Adversity Mental Health BIological Susceptibility and Gender (DREAM BIG) consortium, is looking for a full-time research assistant. This is a prospective cohort of approximately 400 participants and their parent (usually their mother) examining the predictors and modulators of psychopathology. The models of developmental psychopathology are comprehensive and examine the interaction of prenatal adversity, genetic risk (genotype) and postnatal experience (e.g., early maternal care) in the prediction of psychopathology and well-being (http://ladydavis.ca/en/ashleywazana).

The position's primary role is the re-consenting of the young adults and their assessment. We use a mixture of questionnaire (self-report, mother-report, and partner/close friend-report), direct assessment (online CANTAB), and interview methods. Additional tasks (data cleaning, management, and analyses, social media, lab organization, and manuscript preparation) will also be conducted.

Flexible working hours with both in-person (Centre for Child Development and Mental Health at the Lady Davis Institute – Jewish General Hospital) and remote working conditions with a significant level of autonomy.

Qualifications
- Master's level in Psychology or related field.
- Fluently bilingual (work environment is primarily English but MAVAN-R cohort are both English and French speaking).
- Research experience with young adults.
- Knowledge of statistical analyses and the use of statistical packages, including the use of syntax (R and SPSS are primary packages used in the lab) is a strong advantage.
- Creating social media and website content is an advantage.
- Experience interacting with people over virtual tools (Zoom, Teams) is an advantage.

Salary
$40,000 - $54,000/annually in accordance with qualifications and experience.

Location
Montreal, Quebec, Canada
